Sacred Heart Boys High School

2020

SSLC, Percentage: 65%

Projects

AI-Based Fake News Detection System

In Progress

- Building an AI-driven system for detecting fake news using NLP and machine learning models.
- Applied text preprocessing, vectorization, and model training for classification.

Hospital Management System

- Developed dashboards for Admin, Doctor, and Patient roles using React.js, Express.js, and MongoDB.
- Admin dashboard: Manage doctors and patients' records, access appointment history.
- Doctor dashboard: Appointment scheduling and treatment tracking.
- Patient dashboard: View prescriptions, book appointments, access history
